**Support for SAP in Excel for the SAS 9.2 SDK**

**Download**

---

requirements for distributed and cloud computing. It includes a new data surveyor that gives you access to data from Salesforce.com CRM software. SAS 9.2 is a major release of SAS software that enables you to store, manipulate, and analyze data efficiently. This release includes an extensive list of enhancements for Windows, Linux, and SAS/ACCESS. There is also a host of improvements for users of the Java Runtime Environment (JRE) for business analytics with SAS. In this release, SAS addresses market demands and provides a more intuitive interface for querying, analyzing, and reporting. Software Requirements · A Web Server and JRE/JDK is required for SAS Installation and Configuration · SQL Server is not required for SAS Installation and Configuration. SQL Server must be installed for production use of SAS software. Software Compatibility · You need at least the following Microsoft Windows operating system: Windows 2000, Windows XP, Windows Vista, Windows 7, Windows 8, Windows 8.1 · · The SAS release program that provides software and documentation for SAS is divided into two groups: the reference release program and the complementary release program. A SAS reference release provides access to the SAS software. SAS Releases · The reference release includes installation media, online documentation, and runtime and sample code documentation. · Complementary release media contain an installation and configuration package for SAS. It also includes online documentation and runtime documentation. · Compatible release media contain a companion product package (COPY and COPY JOIN) for SAS. It also includes online documentation, runtime documentation, and sample code documentation. · SAS.open.matrix.io C C++ C# Cacao Caffeine CAFÉ CoffeeScript Camino Cardano CASIO SDK Castor (casting system) Cat (mathematical inference system) Ceylon Ceuaweb (Unicode-based microformats for the Internet) CERN Standard Model Web Services Cheetah Chess CherryPy (web framework) Chocolatey (software deployment tool) Chromium (browser) Chromium (web browser) Classic ASP (web technology) Clickteam (user interface scripting language) Cloud Foundry CQRS/ES CrowdIn (software localization platform) CRÓSPROJ-S (Software project in Lab-Tech)
