What's New in the?

View, search, and copy markup annotations from other drawings. New commands to easily switch from one annotation to another and copy and edit annotations. (video: 1:13 min.) Transitions: Simplify transition handling using the improved Tiled With Motion command. Drawing Commands and Reference Materials: Project under construction: Project under construction (UCS) is a new feature that allows you to add new controls to a drawing and manage their properties while the drawing is still in the drawing pane. New grid snap options for more precise grid placement. Workspace management: AutoCAD has a variety of built-in workspace management features. These tools let you make it easier to work with multiple AutoCAD documents. Time-Saving Improvements: Viewing dialog: Work more efficiently and view your drawings in a similar way to your desktop software. Advance search, window manager, and workspace management: Enjoy a more flexible workspace management experience and gain new features to further improve your productivity. Visual Styles: Visual styles are new fonts and color themes that you can apply to your drawings. You can easily apply the colors and font that are appropriate for your project or software. In addition to text styles, you can also create styles for line, area, and polyline commands. Visual styles for your drawings are kept separate from the visual styles that you use on your computer. This means that you can apply and edit your visual styles without affecting the visual styles that you use on your computer. (Video: 3:23 min.) New functionality and performance for Outlook Add-ins: New documentation reference for AutoCAD and soon for Excel. Integrated editors. Automatic data validation. More responsive user interface. Design for the Print Environment: Cross-document references for user-defined material properties: Design a new part on your laptop or desktop computer, and easily send it to the printer, where it gets automatically placed in the correct location in the correct orientation. (video: 5:21 min.) Saving Features: Automatic creation of layers and editing of layer properties in the layer table view. AutoCAD loads all drawing objects in a new view of the drawing, and applies a layer to all drawings in a drawing set or multilevel set. Automatic saving of individual
