While this technology may sound complex, it is in fact quite simple, and it is already in use by some of the world's leading football simulation software developers. In fact, EA Sports used it in FIFA 17 as a baseline, and then the developers made improvements to it. Editors note: While we discuss some of the features of "HyperMotion Technology," we strongly encourage readers to read our hands-on preview of FIFA 22. This will give you a better idea of what the new gameplay features are and how they function. We'll start by touching on the basics of "HyperMotion Technology." It's so basic, in fact, that if you don't use it, you will not notice it. The essential thing to know is that players move in real-life simulations with more speed and accuracy than in previous games. How "HyperMotion Technology" works One of the hallmarks of EA Sports' FIFA is its ability to model an entire match in a way that uses many different players together on the pitch to control the action. FIFA 22 is no exception to this trend. But in order to keep the game running smoothly, you must be able to process all the real-life movement and interactions of the players on the pitch. EA Sports' "HyperMotion" technology does this, and the results are unprecedented realism. Every year at the FIFA producer conference, EA Sports describes the new additions to the gameplay, and it's always interesting to see just how realistic these new additions are. So it was fascinating to see in the FIFA 22 trailer that some of the gameplay aspects were very different than anything we've ever seen in previous games. For instance, we saw a striker with deadly accuracy after receiving a perfectly timed pass. He was able to strike a pinpoint low shot on goal with a timing and placement that had us believing it was a crossbar and not the far post. He even scored a goal using this new skill. Or take the dribbling ability of the new player types such as the "Box to Box" player. They are so good at it that they were able to evade a defender that tried to tackle them off the ball, and then turn past them to make a fast diagonal run. There are other cool new dribbling moves too. Just going by the glimpses of gameplay in the trailer, the controls work well too.

FIFA is football’s world game. Played by fans on a global scale, FIFA has a faithful following, with more than 400 million players around the world. With the latest entry in the critically-acclaimed series, FUT, we invite you to get to know the game through moments that define the sport. What are the gameplay innovations in FIFA 22? FIFA is powered by Football™ – an evolution of the game-changing Player Impact Engine that’s debuted in FIFA 17, and offers the most authentic, comprehensive and immersive football experience possible. This evolution is complemented by a brand-new AI and Attacking Intelligence system that combats the tactics, intelligence and intensity of the world’s most popular teams. Players can masterfully control their style, movement and passing, and individual skill has never been more important in ensuring you succeed. In addition to the all-new Player Impact Engine, FIFA 22 introduces fundamental improvements for all the ways you play the game. For example: Focus on full-speed control to guarantee your shot is on target; Seamlessly control the ball in possession and control your players through free-kicks and corners; A more realistic and convincing ball physics system handles any situation and even enhances the ball’s unpredictable flight; Take advantage of breakthroughs in artificial intelligence to better control your team’s formation and tactics; Create tight, tactical, attacking and midfield play, and change formations any time you like. The all-new Attacking Intelligence system has also been enhanced in every area. Whether you’re leading the opposition from defence, using your full-back to hold the midfield, or controlling a lone striker, the system allows you to play how you want to play. Each team has its own attributes, and individual players respond differently based on how you use them. The relationship between player roles and attributes is like a living, breathing system. Some features can be configured to suit your style of play. How does FIFA 22 compare to FIFA 17? Based on data from more than a million FIFA players, FIFA is the only football game to evolve in the direction of the real thing. FIFA is a different game than FIFA 17, and delivers more authentic action on a global scale. Get closer to the game with FIFA Moments FIFA bc9d6d6daa
